3.1.5. Documents Management (Fred/Moe/Ming)

The document management module shall provide the capability to view and manipulate documents entered by the Instructor/Administrator depending on user account role. Documents will be stored after they have been processed by the part of speech and lexical bundle tagger.

The following functional requirements shall be met:

1. Students shall have the ability to retrieve documents.

2. Instructors shall have the ability to:

    1. Submit a new document to the database.

    2. Submit a modified document to the database.

    3. Delete a document from the database.

    4. Print a document using each slash mark as a carriage return.

    5. Display the exceptions list.

    6. Print the exceptions list.

    7. Perform all functionality afforded to Student users.

3. Administrators shall have the ability to:

    1. Perform all functionality afforded to Instructor and Student users.
